## Class Descriptions

### LES MILLS RPM

RPM™ is a group indoor cycling workout where you control the intensity. It's fun, low impact and you can burn up to 675 calories a session\*\*. With great music pumping and the group spinning as one, your instructor takes you on a journey of hill climbs, sprints and flat riding. You control your own resistance levels and speed so you can build up your fitness level over time. It's a journey, not a race! (Virtual Only)

### LES MILLS sprint

LES MILLS SPRINT™ is a 30-minute High-Intensity Interval Training (HIIT) workout, using an indoor bike to achieve fast results. (Virtual Only) It's a short, intense style of training where the thrill and motivation comes from pushing your physical and mental limits. A high intensity, low impact workout, it's scientifically proven to return rapid results. The 30 minutes you put into a LES MILLS SPRINT workout drives your body to burn calories for hours. You combine bursts of intensity, where you work as hard as possible, with periods of rest that prepare you for the next effort. The payoff? You smash your fitness goals, fast. (Virtual Only)

### LES MILLS THE TRIP

There is nothing else quite like THE TRIP. It's a journey into the future of fitness - what we call exertainment. Inspired by cinema, live concert experiences and interactive gaming, THE TRIP is an immersive fitness experience that combines a purpose-built studio, live instructors with immersive video. The potential for what a workout can be is limitless. (Virtual Only)

### Kettlebells

Unlike a dumbbell, the centre of mass is outside the handle, which means that the Kettle Bell is constantly pulling away from you. Your whole body has to stabilise this, thus working almost every muscle group in your body. This class increases cardiovascular fitness, muscular endurance and power.

### Indoor Cycle

One of our most popular programmes. This is an indoor cycling workout. Take on the terrain with your inspiring team coach who leads you through hills, flats, mountain peaks, time trials, and interval training. Book early to avoid disappointment.

### Boxing for Fitness

Is based on the basics of boxing, Correct boxing training not only works all parts of the body but also all aspects of fitness such as cardiovascular fitness, muscular endurance, muscular strength, stamina, coordination and power, you will also do fitness drills as part of your boxing.

### Circuits

Is a form of aerobic, body conditioning and resistance training using high-intensity, in a circuit or loop format. It targets strength building and muscular endurance; it's a great way to get the most out of your workout!

This is a whole new experience unlike any other virtual class you have done before. All of your Les Mills favourites on an amazing 3 metre wide screen with sound responsive lighting. Features the world's best Les Mills instructors. Our new 'ONDEMAND' feature in our cycle studio allows you to select whatever indoor cycling programme you prefer.
